UI/UX   SEO   Accessibility (a11y)   Internationalization (i18n)

Azure DevOps   Github Actions   Gitlab CI   Circle CI   Travis CI

Scrum   Agile   Git

Strengths

⩤ Collaborative

I am always keen to share knowledge, help, discuss, teach and learn from others. I am able to collaborate with cross-functional teams to create a high-quality end-product.

★ Result-oriented

Many confuse progress with moving in the right direction. I always make sure to check if the team is on the right path.

🖌 Detail-oriented

Continuously focused on how to improve my work and do it the best way I can.

🕐 Project management and prioritization

I am always making sure that project deadlines are met and the required results are delivered on time.

More

I am an open-source software maintainer. My open-source projects are available on NPM. They have been downloaded more than a million times and can be seen on my Github profile.

I have published several articles including guides on how to use Cypress to test authenticated Websockets, how to run multiple Webpack-based applications simultaneously, and how to put a watermark on multiple images using NodeJS. All of my articles and blog posts are available on my personal website.

Atanas Atanasov

Frontend Consultant | Web, Mobile and Desktop Applications Developer | Open-Source Software Maintainer | Team Lead | Mentor

I paint the pixels on your screen!

My focus is delivering tested, standards-compliant, optimized and scalable code while implementing accessible, rich and beautiful user interfaces which provide the best possible user experience.

I've spent more than 12 years converting designs into pixel-perfect UIs.
With strong experience in any aspect of the front-end development, I can help you achieve your goals.

React, Angular or Vue,
SASS or PostCSS,
JavaScript or TypeScript:
you name it and
I will implement it.
